

Project 1: Working with a data.

Link: [Malaria in Africa Dashboard fom 2000 to 2014](#)

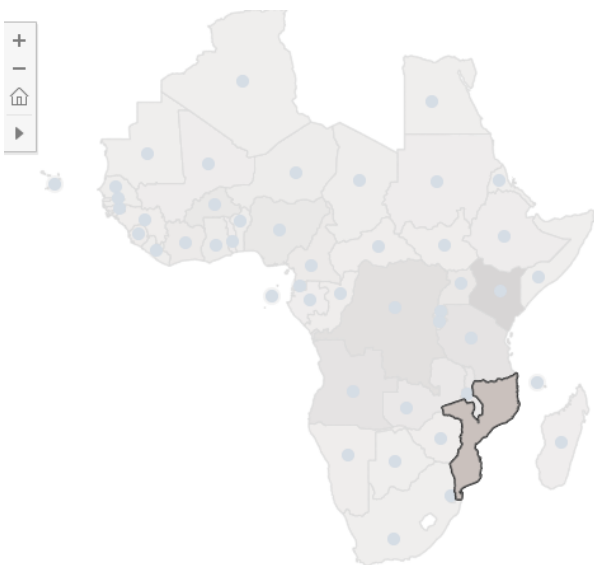

First Insight: When compared to the average of all African countries, Mauritania's average death rate is remarkably low.

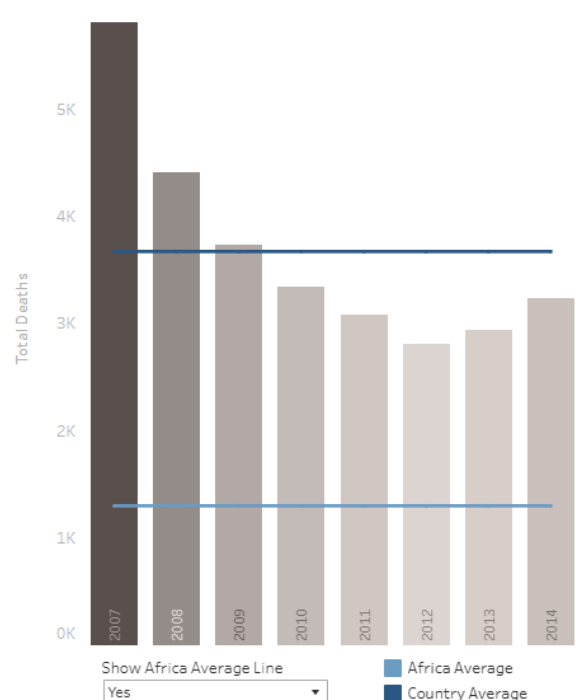

Darker shading marks a higher number of deaths caused by Malaria. Select a country on the map to explore how the number of malaria deaths have changed over time.

Second Insight: Among the deaths of African nations, I have observed that Mozambique has a somewhat higher mortality rate in the most recent recoded years (2013–2014) but before 2013 there was a noticeable decrease in death rate.

Darker shading marks a higher number of deaths caused by Malaria. Select a country on the map to explore how the number of malaria deaths have changed over time.

Third Insight Since 2011, I've noticed a significant drop in Kenya's death rate. The average rate was extremely high prior to that.
